

Before

Why do we care about dirty teeth?

Dirty teeth are not the only problem!

The problem with a “dirty mouth” is that it is teeming with bacteria. Tartar and plaque build-up are just an indication of a deeper problem. If we don’t manage it regularly, these bacteria can have serious consequences. If left alone, poor oral hygiene can lead to:

- Chronic Pain
- Tooth Abscesses
- Heart disease
- ...and more

Dental Disease

It’s not just about “dog breath”

Why we care about dental disease and what we can do about it

Post-procedure

If needed, we will send home:

Pain Medication

Antibiotics

Our Dental Services

Our dental services include:

Scaling

Polishing

Fluoride Treatment

Digital Dental Radiographs
(X-rays)

Extraction if necessary

Professional teeth cleaning requires anesthesia. To protect your pets while they sleep, we provide:

- Pre-anesthetic blood testing
- Intravenous fluids if over the age of five
- Nerve blocks for extractions

Anesthetic monitoring, including:

EKG

Blood Pressure

Oxygen concentration

Heart Rate

Respiratory monitoring

Warm water blanket

This is a great time to start or continue maintenance care. Maintenance includes:

Tooth brushing

Dental Treats

Hill's t/d diet

Oral Rinse if needed

Please ask if you would like a demonstration of maintenance care!
